

ABSTRACT OF THE DISCLOSURE

A dyeing method for dyeing a plastic lens, a plastic lens obtained by use of the dyeing method, and a dyeing system, a dyeing device, and a dyeing jig for a plastic lens are disclosed.

5 The method includes a producing step of producing a print base
body on which a print area is printed with a sublimatable dye
by a printer under control of a computer, the printer being
previously supplied with the dye; a placing step of placing
the print base body and a lens to be dyed so that the print
10 area on the base body is brought into nearly close contact
with a lens surface to be dyed; and a transferring step of
heating at least the print base body to sublimate the sublimatable
dye of the print area, thereby transferring the dye to the
lens surface to be dyed.
